Andi Fitra Furqan

SOC Analyst at DefendIT360 an XLSMART Company | Consultant
TI
West Jakarta, Jakarta, Indonesia

Summary

I am a fresh graduate from the Department of Electrical Engineering
with a concentration in Informatics, currently building my career in
cyber security as a Level 1 SOC Analyst.

I have a strong interest in protecting systems and data from cyber
threats. I am gaining hands-on experience with tools such as IBM
QRadar, Cybereason, SIEM, XDR, and NDR, and I am actively
involved in monitoring and analyzing security incidents.

In addition to my cybersecurity focus, I also have a background in
web development, including HTML, CSS, PHP, and JavaScript,
and have built responsive and interactive websites. This technical
foundation enhances my understanding of vulnerabilities in web-
based systems.

With a solid technical background and a strong willingness to
learn, I am committed to growing in the field of cyber security and
contributing to projects that require deep knowledge of systems,
networks, and information security.
